

## Best Paper Award on Sustainability and Entrepreneurship

Entrepreneurship is an important lever for addressing grand challenges related to environmental sustainability such as biodiversity loss, deforestation, and global warming. Not only can entrepreneurs provide solutions to these grand challenges, but these challenges also provide an opportunity to entrepreneurs to create innovative business models. Research at the intersection of sustainability and entrepreneurship can contribute to this agenda. Rigorous research can provide evidence-based insights to entrepreneurs for using business as a force for change.

Best Paper Award on Sustainability and Entrepreneurship, sponsored by the Ewing Marion Kauffman Foundation will support ONE members to continue this research. Specifically, it will (1) recognize cutting-edge scholarship in this area, and (2) encourage scholars to forge a research agenda at the intersection of entrepreneurship and sustainability.
